

Alumni App

This is a website that will cater for Learnership students and Stakeholders. It has been developed to enhance the potential student with their enquiry and registration process.

The website will serve as a career mapping and achievement mapping portal. The functionality of the website will include the registration of students and it will serve as the knowledge base through the base of discussion forum.

The website will be used both in and out of the classroom and it will require user authentication method, no credentials means no access. The site will be compatible with most popular browser and devices, and responsive.

Technology used

Bootstrap framework to build responsive mobile friendly website.

GitHub repository to collaborate all the codes from all developers.

Programming languages: Multilingual website, Developers will use their preferred language.

Database: SQL
